

Compulsory Assignments

All teaching sessions (Lectures) hold a compulsory assignment.

It is important that you give priority to work with these exercises – in the exercises you learn coding and programming.

You are therefore expected to work solidly with the exercises.

It is mandatory to meet deadline regarding all assignments

Deadline is often right before the start of the subsequent lecture.

Hand-in of assignments takes place on Canvas. You are *not* expected at all times to have solved all parts of the assignments.

There are nine compulsory assignments in all.

Best, Jan
