"Remember My Name"

My name is Jan ... should be easy for you to learn ...
But I have to learn 30+ names ...
You are now multimedia designers and I'm someone who has a challenge: I need an application that can help me learn your names!!!!
Can you help me?

This could be a job involving a multimedia designer
Goal: Create value for the customer.

Requirements Specification:
1. I would like to train your names whenever I have some spare time: At the office, on the bus to and from work etc.
Solution: Web-based application.
2. I should be able to make a guess on your name based on a portrait without a visible name. Then the application should verify my guess by revealing your name.
Now the concept can be designed ...
3. Preferred functionalities: Show name, show all names, hide all names, mix portraits

Additional requirements:
firstname.jpg (all lowercase, no Danish letters, no empty spaces, no numbers or characters other than letters)
Dimension: 210x316px, portrait view, max. 25kb
Upload your photo to hand-in folder on Canvas

Task:
-              Form groups of two
-              Take photos of each other with name tags. Consider background and the ratio 2:3
-              Exchange photos, - own photo on own laptop
-              Edit your photo
-              Upload your photo to Canvas

Deadline: September 5 at 8:30
